

Bracklinn Falls Bridge

Report from Mike Luti:

The bridge now has a sign asking that no more than 6 people should be on it at one time . No stopping allowed . The bridge is owned by the Development Trust and they have a " letter of comfort " from the NPA that the Park will maintain it . The bridge is only eleven years old and the copper roof , which was vandalised years ago , was never replaced . Obviously this gives the impression that it is not safe . The NP has inspected the bridge to find that there is some rot in the main beams . I would like the CC to agree to write to the NPA asking for sight of the inspection report and what they are going to do about it .

Mike.
