**Callander Countryside:**

**Sitka regent and legal buffer zone**

For 2 years now L. Hawkins, Secretary of Callander Countryside, has been trying to find some solution to this issue. If left much longer we will have lost an opportunity to move away from the 'tunnel' effect that we have all experienced in the past. It should also be said that it is a requirement from F.L.S permissions that a 25 metre buffer zone be maintained.

My request to CCC is that we should write to Charles Owen, Woodlands Officer for Scottish Forestry, to pursue this matter.

**Callander Landscape Partnership:**

**C.L.P Draft Signage Proposals**

Crdignish Consulting prepared a report regarding path signage around Callander. The map shows 'Hub points' and proposed siting of signs. The new V.C. has been proposed as an indoor 'hub' although this has not been fully discussed.

A number of signs require advertising consent from the N.P.A, and, of course, landowner agreement will be required.
