

## **Callander's Local Place Plan**

### **Callander Community Council Participation Statement**

Callander Community Council is delighted to participate in developing Callander's Local Place Plan. The Community Council wants to ensure that the plan allows Callander to develop as a healthy, sustainable place for residents and visitors. This should include:

- meeting and ideally beating the 'Net Zero' goal in a creative and innovative way;
- encouraging new and existing businesses to choose Callander and ensure that it is a vibrant town into the future;
- promoting the sustainable use of Callander's landscape to improve the health of both local and visitor populations;
- ensuring that the expanding population is well connected in a physical and social sense. This should include the provision of new bridges to allow safer and shorter walking, cycling and bridleway route between both sides of the river;

Callander Community Council is committed to ensuring that views of the entire community are considered, with any conflicting priorities dealt with in a fair and considered manner.
